

CULTIVATION TRACK & TRACE

Seed-to-Sale Management Platform

Custom SAHPRA Section 22C compliant cultivation management dashboard for Origin by ILCO Farming. This document defines scope, features, and items requiring client input before development begins.

Quote OR-00002

SAHPRA Section 22C

Client Input Required

Custom Software

This Is a Living Document

Items marked **CLIENT INPUT NEEDED** require confirmation during the on-site specification session. All other items are based on standard SAHPRA requirements and industry best practice. Final scope will be locked after the on-site walkthrough.

01 – FACILITY

Facility Profile

We need to understand your physical facility layout to configure zones, rooms, and environmental thresholds correctly.

ITEM	DETAIL	STATUS
Facility Name	To be confirmed on-site	Pending
Physical Address	To be confirmed on-site	Pending
SAHPRA Licence Number	Section 22C(1)(b) licence reference	Pending
Number of Grow Tunnels	e.g., 3 tunnels + 2 indoor rooms	Pending
Indoor Grow Rooms	Number, dimensions, light type	Pending
Processing / Drying Area	Separate zone? Capacity?	Pending
Existing Sensors / IoT	Brand, protocol (WiFi/Zigbee/LoRa), API available?	Pending
Internet Connectivity	Fibre / LTE / Starlink? Bandwidth?	Pending

02 – BATCH LIFECYCLE

Seed-to-Sale Pipeline

The standard 7-phase batch lifecycle. Confirm if your operation follows this flow or requires modifications.

 **Strains Grown**

Which cannabis strains are currently cultivated? We need strain names, typical grow times, and THC/CBD profiles for batch tracking and yield benchmarking.

 **Batch Naming Convention**

Default format: **OR-B-YYYYMMDD-NNN**. Do you have an existing batch ID system? Do you need to match SAHPRA format requirements?

CLIENT INPUT NEEDED

CLIENT INPUT NEEDED

Growth Media

Soil, coco, hydroponic, or mixed? This affects nutrient logging fields and environmental parameter defaults.

CLIENT INPUT NEEDED

Additional Phases

Do you need extra phases beyond the standard 7? E.g., quarantine, lab testing hold, curing room, packaging. Custom phases can be added.

CLIENT INPUT NEEDED

03 — ENVIRONMENT

Environmental Monitoring

Sensor data captured per zone. Confirm your target thresholds and alert preferences.

PARAMETER	DEFAULT RANGE	YOUR TARGET
Temperature	20°C – 30°C	Confirm per zone
Humidity (RH)	40% – 70%	Confirm per zone
CO2 (ppm)	400 – 1500 ppm	Confirm if supplementing CO2
Light Hours	12–18 hrs (phase dependent)	Confirm per phase
VPD (auto-calc)	0.8 – 1.2 kPa	Confirm target range
Soil Moisture	Optional	Do you measure? Sensor brand?

Alert Channels

Where should environmental breach alerts be sent? Options: Dashboard notification, WhatsApp, Telegram, SMS, Email. Who receives them?

CLIENT INPUT NEEDED

Sensor Integration

Do you have existing sensors with API access? We can auto-ingest readings. Otherwise manual entry is supported via dashboard and mobile.

CLIENT INPUT NEEDED

04 — HARVEST

Harvest & Quality Control

Weight recording, quality grading, and lab result tracking.

Weight Recording

Wet weight, dry weight, trim weight, waste weight — all in grams. Yield percent auto-calculated as (dry/wet) × 100.

CONFIRMED

Quality Grading

Three-tier grading: Grade A (premium), Grade B (standard), Grade C (processing grade). Visual badge on each harvest record.

CONFIRMED

Lab Testing

Which lab do you use for cannabinoid testing? Do they provide digital results (API/CSV) or paper certificates only? We track: THC%, CBD%, terpene profile, microbiology pass/fail.

CLIENT INPUT NEEDED

Scale Photos

Do you photograph each harvest on the scale? We support photo upload per harvest record (JPEG/PNG/WebP, max 10MB). Required for SAHPRA audit trail?

CLIENT INPUT NEEDED

05 — COMPLIANCE

SAHPRA Compliance & Audit

Built-in compliance scoring engine aligned to Section 22C requirements.

Compliance Score

5-category scoring:
Environmental, Harvest,
Batch Tracking,
Documentation, Reporting.
Traffic-light display
(green/amber/red).

CONFIRMED

Audit Packages

One-click audit package
generator. Selectable date
range. Includes zone
summaries, batch counts,
environmental averages,
breach history, yield stats.

CONFIRMED

17

Document Tracker

Upload and track compliance
documents with expiry dates.
Auto-alerts when documents
approach expiry (30/14/7
days).

CONFIRMED

Required Documents

Which compliance documents must be tracked?
Common: SAHPRA licence, GMP cert, pest
management plan, SOPs, insurance, water quality
cert, waste disposal agreement.

CLIENT INPUT NEEDED

Compliance Roles

Who is the designated compliance officer? Who
can generate audit packages? Current roles:
cultivator, farm_manager, compliance_officer.
Need additional roles?

CLIENT INPUT NEEDED

06 — ACCESS

Users & Access Control

Role-based access with OTP + PIN authentication.

ROLE	ACCESS LEVEL	STAFF COUNT
Farm Manager	Full dashboard access — all zones, batches, compliance, reports	How many?
Cultivator	Zone monitoring, batch updates, environment entry, harvest recording	How many?
Compliance Officer	Compliance dashboard, audit packages, document management, reports	How many?

ROLE	ACCESS LEVEL	STAFF COUNT
Owner / Super Admin	Everything + user management + system config	Linked to existing Origin owner login

07 — REPORTS

Reports & Export

Four standard report types with CSV export. Additional custom reports available on request.

Production Report
Batch counts by phase, total plants, completions, average cycle time.

CONFIRMED

Environmental Report
Average temp/humidity/CO2 per zone, breach counts, compliance percentage.

CONFIRMED

Yield Report
Yield by strain, average dry weight, yield trends over time, quality grade distribution.

CONFIRMED

Waste Report
Waste weight totals, waste as % of total harvest, disposal tracking for SAHPRA compliance.

CONFIRMED

Custom Report Requirements
Do you need any additional reports beyond the four standard types? E.g., water usage, nutrient cost tracking, labour hours per batch, energy consumption. These can be added as part of customisation.

CLIENT INPUT NEEDED

08 — ON-SITE SESSION

On-Site Specification Checklist

Items to cover during the on-site walkthrough. Bring this document to the session.

- ☐ **Facility walkthrough** — photograph each zone/tunnel/room, note dimensions and capacity
- ☐ **Strain catalogue** — list all strains currently grown with typical cycle times
- ☐ **Batch ID convention** — confirm or customise the naming format
- ☐ **Environmental thresholds** — confirm target ranges per zone per growth phase
- ☐ **Sensor inventory** — list existing sensors, check API/data export capability
- ☐ **Staff list & roles** — names, phone numbers, email addresses, and assigned roles
- ☐ **Lab testing partner** — contact details, result format (API/CSV/paper)
- ☐ **Compliance documents** — gather current SAHPRA licence, GMP cert, SOPs, etc.
- ☐ **Alert preferences** — confirm notification channels and recipients
- ☐ **Custom report needs** — any reporting beyond the 4 standard types
- ☐ **Additional pipeline phases** — confirm if curing, quarantine, or packaging phases are needed
- ☐ **Internet connectivity test** — verify bandwidth and reliability on-site
- ☐ **Sign-off** — lock scope, confirm quote OR-00002, agree on go-live date

09 — TIMELINE

Implementation Timeline

From scope sign-off to go-live.

PHASE	SCOPE	TIMELINE
Phase 1 — Foundation	Backend models, API, auth, dashboard shell, CSS	Complete

PHASE	SCOPE	TIMELINE
Phase 2 — Zones + Environment	Zone CRUD, gauges, trend charts, threshold alerting	Complete
Phase 3 — Batches + Harvests	Kanban pipeline, phase transitions, harvest recording, yield analytics	Complete
Phase 4 — Compliance + Reports	Scoring engine, audit packages, document tracker, CSV reports	Complete
Phase 5 — Customisation	Client-specific config: zones, thresholds, strains, roles, custom phases	After On-Site
Phase 6 — Deploy & Train	Production deployment, seed data, staff accounts, hands-on training	After Phase 5

ORIGIN CULTIVATION

Custom seed-to-sale software for SAHPRA-compliant cannabis cultivation. Built by FloRouter AI for ILCO Farming.
