

AI MARKETING AUTOMATION

Implementation Strategy for Origin by ILCO Farming

Automated marketing suite powered by Claude AI. Website audits, email sequences, social calendars, SEO analysis, competitor intelligence, and client-ready reports — all automated.

Claude AI Powered

14 Marketing Skills

5 Parallel Agents

scrape.do Integration

01 — OVERVIEW

What We're Building

An AI marketing engine that runs on autopilot for Origin by ILCO Farming — generating content, auditing performance, and producing client-ready deliverables.

Audit & Analyse

Full marketing audit with 5 parallel AI agents scoring your site across 6 dimensions. Instant competitive intelligence.

Generate Content

Email sequences, social media calendars, ad copy, landing page copy — all generated to match your brand voice.

Report & Propose

Professional marketing reports (MD + PDF), client proposals, SEO audits, and funnel analysis — client-ready.

02 — ARCHITECTURE

Technical Architecture

How the marketing suite integrates with the Origin platform and scrape.do for web intelligence.

COMPONENT	TECHNOLOGY	PURPOSE
Orchestrator	market/SKILL.md	Routes /market commands to the correct sub-skill
14 Sub-Skills	skills/market-*/SKILL.md	Audit, copy, emails, social, ads, funnel, competitors, landing, launch, proposal, report, SEO, brand
5 AI Agents	agents/market-*.md	Content, conversion, competitive, technical, strategy — run in parallel for audits
Web Scraping	scrape.do API	Fetches competitor sites, target URLs, and marketing data. Replaces Firecrawl.
Python Scripts	analyze_page.py, competitor_scanner.py, social_calendar.py, generate_pdf_report.py	Automated page analysis, competitor scanning, calendar generation, PDF output
Templates	6 Markdown templates	Welcome emails, nurture sequences, launch sequences, proposals, content calendars, checklists

03 — COMMANDS

Available Commands

15 marketing commands available in Claude Code. Each produces actionable, client-ready output.

COMMAND	WHAT IT DOES	OUTPUT
/market audit <url>	Full marketing audit — 5 parallel agents, 6-dimension scoring	MARKETING-AUDIT.md
/market quick <url>	60-second snapshot: headline, CTA, value prop, trust signals	Terminal output
/market copy <url>	Generate optimized copy with before/after examples	COPY-SUGGESTIONS.md
/market emails <topic>	Complete email sequences (welcome, nurture, launch, re-engage)	EMAIL-SEQUENCES.md
/market social <topic>	30-day content calendar with platform-specific posts	SOCIAL-CALENDAR.md
/market ads <url>	Ad creative and copy for all platforms	AD-CAMPAIGNS.md
/market funnel <url>	Sales funnel analysis and optimization	FUNNEL-ANALYSIS.md
/market competitors <url>	Competitive intelligence report	COMPETITOR-REPORT.md
/market landing <url>	Landing page CRO analysis	LANDING-CRO.md
/market launch <product>	Product launch playbook	LAUNCH-PLAYBOOK.md
/market proposal <client>	Client proposal with findings and pricing	CLIENT-PROPOSAL.md
/market report <url>	Full marketing report (Markdown)	MARKETING-REPORT.md
/market report-pdf <url>	Professional marketing report (PDF)	MARKETING-REPORT.pdf
/market seo <url>	SEO content audit with technical analysis	SEO-AUDIT.md
/market brand <url>	Brand voice analysis and guidelines	BRAND-VOICE.md

04 — WEB INTELLIGENCE

scrape.do Integration

All web scraping powered by scrape.do API — replacing Firecrawl for competitor analysis, site auditing, and content extraction.

Site Scraping

Fetch any URL with JavaScript rendering, proxy rotation, and anti-bot bypass. Extract clean HTML/text for AI analysis.

Competitor Intel

Scrape competitor websites to extract pricing, features, messaging, and positioning for competitive analysis reports.

SEO Data

Extract meta tags, heading structure, schema markup, link profiles, and page speed indicators for SEO audits.

Content Extraction

Pull blog posts, landing page copy, and product descriptions for brand voice analysis and copy optimization.

API Configuration

scrape.do API key configured. Base URL: https://api.scrape.do?token=YOUR_KEY&url=TARGET. Supports JS rendering, residential proxies, and custom headers. Rate limit: 100 req/min on standard plan.

05 — USE CASES

How ILCO Uses This

Practical marketing automation scenarios for Origin by ILCO Farming's cannabis collection point business.

Monthly Email Campaigns

Command: `/market emails "Origin cannabis collection point Potchefstroom"`

Auto-generates: welcome sequences for new customers, product launch emails for new strains,

Social Media Calendar

Command: `/market social "Origin cannabis lifestyle South Africa"`

Auto-generates: 30-day content calendar for Instagram, Facebook, and Twitter. Strain spotlights,

re-engagement for inactive customers, Section 21 education series.

education posts, behind-the-scenes, community engagement. Cannabis-compliant copy.

Competitor Monitoring

Command: `/market competitors`
<https://origin.cleva-ai.co.za>

Monitors: competitor pricing, product range, messaging, SEO positioning. Generates competitive intelligence reports to identify gaps and opportunities in the SA cannabis market.

Monthly Performance Audit

Command: `/market audit`
<https://origin.cleva-ai.co.za>

Monthly audit: 5 parallel agents score the site across content, conversion, SEO, competitive positioning, brand trust, and growth strategy. Track score improvement over time.

New Branch Launches

Command: `/market launch "Origin Potchefstroom cannabis collection point"`

Complete launch playbook: pre-launch buzz, launch week campaigns, email sequences, social content, ad copy, influencer outreach strategy.

SEO Domination

Command: `/market seo`
<https://origin.cleva-ai.co.za>

Full SEO audit: on-page optimization, meta tags, heading structure, schema markup, content gaps, keyword recommendations. Target: "cannabis Potchefstroom", "Section 21 South Africa", "CBD near me".

06 — WORKFLOW

Monthly Marketing Cycle

Automated monthly marketing workflow — what runs, when, and what it produces.

WEEK	ACTION	OUTPUT
Week 1	<code>/market audit + /market seo</code> — Monthly site audit and SEO check	MARKETING-AUDIT.md, SEO-AUDIT.md
Week 1	<code>/market competitors</code> — Competitive landscape scan	COMPETITOR-REPORT.md

WEEK	ACTION	OUTPUT
Week 2	<code>/market social</code> — Generate next month's social calendar	SOCIAL-CALENDAR.md (30-day plan)
Week 2	<code>/market emails</code> — Monthly email campaigns	EMAIL-SEQUENCES.md
Week 3	<code>/market ads</code> — Ad copy for campaigns	AD-CAMPAIGNS.md
Week 3	<code>/market copy</code> — Landing page optimization	COPY-SUGGESTIONS.md
Week 4	<code>/market report-pdf</code> — Monthly performance report for client	MARKETING-REPORT.pdf

07 — TIMELINE

Implementation Timeline

From installation to fully operational marketing automation.

Done

Phase 1 — Install Marketing Suite

14 skills, 5 agents, 4 Python scripts, 6 templates installed into Claude Code. reportlab installed for PDF generation.

Week 1

Phase 2 — scrape.do Integration

Configure scrape.do API key in Python scripts. Replace default WebFetch calls with scrape.do for JavaScript-rendered pages. Test against origin.cleva-ai.co.za and 3 competitor sites.

Week 1

Phase 3 — Brand Voice Configuration

Run `/market brand` to extract Origin brand voice guidelines. Configure all content generation to match: Cinzel headings, Inter body, gold palette, premium cannabis positioning, SAHPRA-compliant language.

Week 2

Phase 4 — First Full Audit

Run `/market audit` on `origin.cleva-ai.co.za`. Baseline marketing score across 6 dimensions. Identify top 10 quick wins and implement.

Week 2

Phase 5 — Content Pipeline Launch

Generate first social calendar, email sequences, and ad campaigns. Client review and approval workflow. Schedule first month of automated content.

Week 3+

Phase 6 — Ongoing Automation

Monthly marketing cycle operational. Weekly audits, monthly reports, continuous content generation. Track marketing score improvement month-over-month.

08 — SCORING

Marketing Score Methodology

How we measure and track marketing performance over time.

CATEGORY	WEIGHT	WHAT IT MEASURES
Content & Messaging	25%	Copy quality, value propositions, headlines, CTAs, cannabis-specific compliance
Conversion Optimization	20%	Funnels, forms, social proof, friction points, age gate, Section 21 flow
SEO & Discoverability	20%	On-page SEO, technical SEO, local SEO (Potchefstroom), schema markup
Competitive Positioning	15%	Differentiation, market awareness, pricing positioning vs SA cannabis market
Brand & Trust	10%	Brand consistency, trust signals, SAHPRA compliance visibility, reviews
Growth & Strategy	10%	Pricing strategy, acquisition channels, loyalty/points program, referral

Target: Baseline audit in Week 2 → improve marketing score by 15+ points within 3 months through automated content, SEO fixes, and conversion optimization.

ORIGIN MARKETING AUTOMATION

Powered by Claude AI + scrape.do. 14 skills, 5 parallel agents, automated content pipeline for ILCO Farming.
