PROCEDURE FOR PERSONAL HYGIENE AND PPE

SOP No:	4-FPH-009	Effective Date:	2020-05-20
Revision No:	2	Supersedes:	1
Revise By:	2022-05-20		

LIST OF ABBREVIATIONS

AR	Authorised Representative
SOP	Standard Operating Procedure
PPE	Personal protective equipment

1. OBJECTIVE:

This SOP describes the process of maintaining a high level of personal hygiene at ILCO Farming (Pty) Ltd. It includes the requirements to be met for correct use of dress code and personal protective equipment.

2. SCOPE:

This SOP is a mandatory document and shall be implemented by all employees and contractors when personal hygiene at the Medicinal Cannabis within ILCO Farming (Pty) Ltd.

3. RESPONSIBILITY:

AR Authorised Representative
FM Facility Manager
ASM All Staff Members

4. POLICY:

The AR of ILCO Farming (Pty) Ltd shall ensure that the procedure is adhered to at the facility and that health and hygiene requirements for all staff are understood and correctly applied. Employees must maintain a high standard of personal hygiene. Health of personnel shall be monitored according to the company procedures, initially upon employment and at regular intervals thereafter. No person with a communicable disease shall be allowed to work in areas directly in contact with medicinal cannabis components and/or products. All personnel shall wear clean and tidy clothing in the workplace in accordance with the respective management decision, and the supervisors shall be responsible for this control.

SOP No:	4-FPH-009	Effective Date:	2020-05-20
Revision No:	2	Supersedes:	1
Revise By:	2022-05-20		

5. PROCEDURE:

- 5.1 The facility has been designed to optimise the flow of personnel through the building, from entry in street clothes, to acceptable ablution facilities, where site garments will be stored in lockers, to entry via a PPE area for additional protection, before either entering the cultivation area or the product processing area.
- 5.2 Clear signage is installed in all areas regarding staff requirements for: washing hands; hygiene processes; dress-code; PPE.
- 5.3 Staff will be trained to adhere to the following:
- 5.3.1 Staff must arrive at work in clean clothing.
 - 5.3.2 They enter the change rooms where they change out of their outer street clothes and shoes and put on the clean garments and facility shoes, specified by ILCO Farming (Pty) Ltd. for each area of the facility.
 - 5.3.3 Hands must be thoroughly washed with soap and water, for 20 seconds, each time after having exited the toilet.
 - 5.3.4 They will keep the changeroom clean and this will be inspected by the AR or designee on a daily basis.
 - 5.3.5 Staff will leave their personal items, such as wallets, phones, handbags in personal lockers situated in the changerooms.
 - 5.3.6 Single use paper towel will be used. No cotton towels are permitted.
 - 5.3.7 No food or drinks are permitted to be taken into or stored in the changeroom lockers. Staff will store their food and drinks in the canteen area. No food or drinks are permitted in the cultivation and processing areas of the facility.
- 5.4 ILCO Farming (Pty) Ltd. has contracted with a laundry service provider to clean employee's garments.
- 5.4.1 The signed service level agreement will be in place and renewed timeously on an annual basis.
 - 5.4.2 The laundry service will perform the following activities:
 - Collection of soiled garments daily or as arranged
 - Drop-off of clean garments daily or as arranged
 - Selection of cleaning chemicals and disinfection processes
- 5.5 The contracted laundry service provider will clean the garments according to the following processes:
- 5.5.1 They will apply SANS 10146-Part 1: Process Management Section 7.3 for chemical disinfection.

Revision No:	2	Supersedes:	1
Revise By:	2022-07-06		

LIST OF ABBREVIATIONS

AR	Authorised Representative
SOP	Standard Operating Procedure

1. OBJECTIVE:

This SOP describes the process for the control of pests at ILCO Farming.

2. SCOPE:

This SOP applies to the Authorised Representative when selecting and agreeing contracts with pest control service companies at ILCO Farming.

3. RESPONSIBILITY:

AR	Authorised Representative
QAM	Quality Assurance Manager

4. POLICY:

The monitoring of the control of pests will be performed by the pest control contractor at the facility on a once per month basis. Pest control companies utilised must be registered with the Department of Agriculture. Bait and insect lights shall be inspected for any pest activities, reported and records shall be kept for 5 years. The AR or QAM will ensure that all roles and responsibilities are specified in a service level agreement with the pest control company.

5. PROCEDURE:

5.1 The AR will ensure that a regular pest control program is in place, performed by a contracted pest control company.

5.2 A service level agreement will be in place with the pest control company.

5.3 A site plan will be compiled showing the location of the insect lights, the internal and external bait stations, and any relevant equipment.

5.4 Bait stations will be clearly identified and numbered.

5.5 Inspection of pest control units will be carried out monthly, by the contracted company.

- 5.6** Records will be kept of every service or poison application, with details of the areas treated and the type of poison or bait used. Non-toxic bait will be permitted inside the facility.
- 5.7** A report is issued by the contracted company to ILCO Farming after each service.
- 5.8** Any infestation noted at any time will immediately be reported to the AR, who will take the necessary action to ensure that a de-contamination treatment of the facility takes place.
- 5.9** On-going surveillance of the success of the rodent/pest control program will be monitored by the QAM who will review each monthly report, and either approve it by signing and dating it, or raise a deviation if non-compliance is noted.
- 5.10** The monthly reports will be filed and retained for a period of 5 years.

Revise By:	2022-07-02		

LIST OF ABBREVIATIONS

SAHPRA	South African Health Products Regulatory Authority
AR	Authorised Representative
SOP	Standard Operating Procedure
FM	Facility Manager

1. OBJECTIVE:

This SOP describes the process for vendor approval at ILCO Farming.

2. SCOPE:

This SOP describes the process to follow to approve vendors of cultivation and processing facility items required for ILCO Farming.

3. RESPONSIBILITY:

AR	Authorised Representative
FM	Facility Manager

4. POLICY:

All new vendors must be verified before items are added onto the approved vendors list and items are accepted into the ILCO Farming's facility. No unauthorised item will be ordered from a vendor who is not approved.

5. PROCEDURE:

- 5.1 A list of items required by the cultivation area and by the processing facility will be compiled.
- 5.2 The FM will identify possible sources of vendors to supply each item.
- 5.3 The vendor will supply details of each item to the FM who will capture these onto the ordering system.
- 5.4 Any changes required to an item or a new vendor will be discussed with the AR for approval, prior to a change.
- 5.5 The FM will only receive items into the facility that are included in the approved list.

LIST OF ABBREVIATIONS

SAHPRA	South African Health Products Regulatory Authority
AR	Authorised Representative
SOP	Standard Operating Procedure

1. OBJECTIVE:

This SOP describes the process for distribution of medicinal cannabis products from ILCO Farming (Pty) Ltd to the international client according a valid Offtake Agreement.

2. SCOPE:

This SOP pertains to the movement of finished, packed medicinal cannabis flower product exported from South Africa.

3. RESPONSIBILITY:

AR	Authorised Representative
QAM	Quality Manager
FF	Freight Forwarders

4. POLICY:

ILCO Farming (Pty) Ltd is committed to complying with all laws and regulations governing the export to its medicinal cannabis products. Personnel will understand these regulations to be compliant.

5. PROCEDURE:

5.1 The Authorised Representative will ensure that goods and medicines will be dispatched to valid clients only.

5.2 Validity is checked according to the latest valid Off-take Agreement on file.

Revision No:	2	Supersedes:	1
Revise By:	2022-06-05		

5.3 Once validity is confirmed, the client is then entered on the "List of Approved Clients" document kept on file.

5.4 All medicinal cannabis products for export must be strictly controlled by recording:

- Date of delivery
- Time of departure for delivery
- Name and address of recipient
- Banking documents
- Certificate of pre-shipment inspection
- Proof of delivery to freight forwarder
- Date delivered to freight forwarder
- Copy of Airway bill

5.5 All medicinal cannabis products for delivery must be correctly weighed, packed and sealed to avoid contamination or theft according to the guidelines issued by SAHPRA.

5.6 During the delivery process control must be exercised to ensure that the medicinal cannabis is not subjected to excessive temperature deviations.

5.7 Regular checks must be performed on the data collected on deliveries to ensure compliance to requirements.

5.8 Airway bills must be kept on record with the temperature recording sheet.

5.9 The 22C Licence issued by SAHPRA (or SAHPRA approval resolution letter) allows for the specified product/s in the Licence application, to be exported to the customer identified in the Offtake Agreement.

ABBREVIATIONS:

AR	Authorised Representative
SOP	Standard Operating Procedure
CoA	Certificate of Analysis
QC	Quality Control
ADR	Adverse Drug Reaction
OOT	Out of Trend
CAPA	Corrective Action, Preventative Action

1. OBJECTIVE:

To ensure that a system is in place for checking the trend analysis of technical quality complaints, product test results and deviations for ILCO Farming (Pty) Ltd.

2. RESPONSIBILITY:

AR	Authorised Representative
QAM	Quality Assurance Manager

3. SCOPE:

This SOP describes what parameters are included in the trend analysis process within the facility for ILCO Farming (Pty) Ltd.

4. POLICY:

Procedures will be followed for checking the trend of technical quality complaints, product test results and deviations. Investigations will be initiated where an out of trend parameter is identified.

5. PROCEDURE:

5.1 Technical Quality Complaints:

- 5.1.1 All technical quality complaints will be noted in the Technical Quality Complaints register.
- 5.1.2 The QAM will review the register on a monthly basis to assess if a potential OOT is occurring.
- 5.1.3 The potential OOT will be documented in the register as a comment.
- 5.1.4 The QAM will initiate an investigation to determine if any root cause can be identified.

Revise By:	2022-07-06		

5.1.5 If a corrective action is identified, the QAM will open a CAPA form following SOP: 4-FPH-003 Procedure for CAPA.

5.2 Deviations in QC test results:

5.2.1 The QAM will review each finished product's COA to ensure that all final product parameters are within specification limits.

5.2.2 The QC results are logged and analysed.

5.2.3 If an OOT is noted, the QAM will review the batch processing records to determine if the OOT result is batch specific or product specific.

5.2.4 The potential or confirmed OOT will be documented in the batch release register as a comment.

5.2.5 If a corrective action is identified, the QAM will open a CAPA form following SOP: 4-FPH-003 Procedure for CAPA.

5.3 Deviations in the processing or packaging activities:

5.3.1 The QAM will review the deviations register on a monthly basis to assess if a potential OOT is occurring in a particular area of the facility or in a particular product.

5.3.2 The QAM will discuss the details with the AR and the FM to determine if process or product improvements are required.

5.3.3 The QAM will open a CAPA form, when required, to process the improvements agreed.

PROCEDURE FOR FINISHED PRODUCT RELEASE

Page 2 of 6

SOP No:	4-FPH-015	Effective Date:	2020-07-01
Revision No:	2	Supersedes:	1
Revise By:	2022-07-01		

5.2 Approved finished product specifications will be on file specifying all criteria required to be met before each batch is approved for release.

5.3 Samples of each batch of finished product are taken by the QAM. Refer to SOP: 4-FPH-017 Procedure for Sampling. The QAM will inspect samples of the packed finished product and record observations on the FPRF.

5.4 The contract laboratory will test the samples and will send a COA to the Facility.

5.5 The QAM will review the following documentation and record the findings on the FPRF (Refer to Attachment 6.3):

- 5.5.1 Batch processing record
- 5.5.2 In-process test results
- 5.5.3 Batch packing record
- 5.5.4 QC Laboratory COA
- 5.5.5 Temperature and Relative humidity data for the areas used for each batch
- 5.5.6 Deviation records (where applicable)
- 5.5.7 Reprocessing records (where applicable)

5.6 Where a batch complies fully with all specifications, the QAM will approve the batch for release and sign the FPRF.

5.7 The AR will review the FPRF and if agrees that all is compliant, the AR will approve the batch for sale and sign the FPRF.

5.8 The number of units available for sale is recorded on the FPRF.

5.9 The QAM will strike through the quarantine stickers, then apply approved stickers on each container and sign and date these.

5.10 The approved batch is moved to the access-controlled Finished Product Storage area.

5.11 The raw data is retained for a minimum of 5 years.

Attachment 6.3

FINAL PRODUCT RELEASE FORM

Analytical Batch Review

Final product name and pack size / weight		
Finished product batch number		
Expiry date		
Batch Processing Record number		
Date: Start of Drying		
Quantity in Kgs at end of Drying		
Date: Start of Packing		
Quantity of units packed		
Date: Retention Sample Taken		
Number of samples retained		
Visual identification of product with reference to master product description specification		
Record temperature & humidity report numbers for each processing area used for each batch		
Temperature & Humidity results in specification	YES	NO
QC Laboratory COA report number and date		
QC results in specification	YES	NO
Record Deviation Number (where applicable)

LIST OF ABBREVIATIONS

GAP	Good Agricultural Practice
GSP	Good Storage Practice
AR	Authorised Representative
SOP	Standard Operating Procedure
SAHPRA	South African Health Products Regulatory Authority
IPC	In-Process Control
THDL	Temperature and Humidity Data Logger
COA	Certificate of Analysis
QC	Quality Control

1. OBJECTIVE:

To ensure that adequate and compliant procedures are followed at ILCO Farming (Pty) Ltd pertaining to quality control of the medicinal cannabis product cultivated and processed on site.

2. SCOPE:

This SOP explains the process followed when medicinal cannabis undergoes in-process control testing on site and comprehensive testing performed at a contract laboratory.

3. RESPONSIBILITY:

AR	Authorised Representative
QCR	Quality Control Representative
HOD	Heads of Departments

4. POLICY:

All medicinal cannabis products will be tested according to quality control specifications and tests to ensure the products meet their pre-determined specification and comply with standards set by SAHPRA, based on the Medicines and Related Substances Act, Act 101 of 1965.

STANDARD OPERATING PROCEDURE

PROCEDURE FOR TESTING REQUIREMENTS

Page 2 of 14

SOP No:	4-FPH-016	Effective Date:	2020-05-18
Revision No:	2	Supersedes:	1
Revise By:	2022-05-18		

5.1 In-process control testing will be performed on site, during the processing of the harvested plant material, as follows:

- 5.1.1 The IPC test is the weight of each batch of harvested material, which will be taken and recorded on the processing documentation, prior to the start of the trimming process.
- 5.1.2 The next IPC test is the weight of the trimmed batch, which will be taken and recorded on the processing documentation prior to the start of the drying operation.
- 5.1.3 During drying, the temperature and humidity readings will be constantly monitored using a THDL system to ensure compliance.
The IPC test is the drying time to be applied to each batch under the specified environmental conditions.
- 5.1.4 After drying, the IPC test is the weight of the dried material of each batch. This will be recorded in the processing documentation.
- 5.1.5 Packing is a manual process, based on weighing out a specified mass of product into each container. The final IPC test is the nett weight of each packed product. This will be recorded in the processing documentation.
- 5.1.6 Each balance will be calibrated before use, by an external service provider.
- 5.1.7 Daily weight verification checks are performed by the operators to ensure that the balance remains within its calibrated specification range.

5.2 Laboratory testing of finished packed product:

- 5.2.1 All medicinal cannabis products will be tested in a contract testing laboratory prior to being exported. The following European Pharmacopoeia (Ph. Eur.) general monographs will be the source of the QC test methods used:
 - Herbal Drugs (1433)
 - Herbal Drug Preparations (765)
 - Herbal Drug Extracts (765)
 - General monographs for dosage forms e.g. Oral mucosal Preparations.
 - EMA guideline - Guidance on Specifications: Test Procedures and Acceptance Criteria for Herbal Substances, Herbal Preparations and Herbal Medicinal Products/Traditional Herbal Medicinal Products (CPMP/QWP/2820/00 Rev 2).
- 5.2.2 The results will be verified and signed by the contract laboratory who will capture them on a COA and send this to ILCO Farming (Pty) Ltd. For review and approval.
- 5.2.3 ILCO Farming (Pty) Ltd. will evaluate that the test results indicate the following:
 - The concentration of tetrahydrocannabinol meets the potency requirements.

PROCEDURE FOR TESTING REQUIREMENTS

Page 3 of 14

SOP No:	4-FPH-016	Effective Date:	2020-05-18
Revision No:	2	Supersedes:	1
Revise By:	2022-05-18		

- The labeling of the concentration of tetrahydrocannabinol and cannabidiol is accurate.
- The medicinal cannabis product is safe for human consumption and free from contaminants that are unsafe for human consumption.

5.2.4 Analytical tests will include the following, but are not limited to those mentioned as follows:

- Appearance.
- Foreign Material.
- Fineness/Particle Size
- Identification A: Microscopic Properties.
- Identification B: TLC.
- Microbiological Contamination.
- Aflatoxins.
- Pesticides.
- Heavy Metals.
- Loss on Drying.
- Assay and Related Substances.

5.3 SAMPLES:

ILCO Farming (Pty) Ltd. will retain records of all testing performed and take and store retention samples of each batch of medicinal cannabis packed product.

5.4 CONTRACT LABORATORY:

ILCO Farming (Pty) Ltd. will contract with a licensed medicinal cannabis testing laboratory who will confirm that they are authorized to perform the QC tests they have included in their contract with ILCO Farming (Pty) Ltd. They will also confirm that they comply with and adhere to following good laboratory practice.

5.5 CANNABINOIDS TESTS:

5.5.1 The tests required to be performed depend on the requirements of ILCO Farming (Pty) Ltd.'s customer, as specified in the Off-Take Agreement.

5.5.2 The laboratory may test for and report results for the following cannabinoids:

- THC
- THCA

STANDARD OPERATING PROCEDURE

PROCEDURE FOR TESTING REQUIREMENTS

Page 4 of 14

SOP No:	4-FPH-016	Effective Date:	2020-05-18
Revision No:	2	Supersedes:	1
Revise By:	2022-05-18		

- CBD
- CBDA
- CBG
- CBN

- 5.5.3 For harvest-batch samples, a laboratory shall report, to 3 significant figures, the concentration in milligrams per gram (mg/g) dry-weight sample of the cannabinoids listed above.
- 5.5.4 For harvest-batch samples, a laboratory shall also calculate the dry-weight percent of cannabinoids listed above that are detected in the sample in the following way:
- Dry-weight percent THC = wet-weight percent THC / (1 – percent moisture/100).
 - Dry-weight percent CBD = wet-weight percent CBD / (1 – percent moisture/100).
 - Dry-weight percent THCA = wet-weight percent THCA / (1 – percent moisture/100).
 - Dry-weight percent CBDA = wet-weight percent CBDA / (1 – percent moisture/100).
 - Dry-weight percent CBG = wet-weight percent CBG / (1 – percent moisture / 100).
 - Dry-weight percent CBN = wet-weight percent CBN / (1 – percent moisture / 100).
- 5.5.5 For samples from manufactured cannabis batches, a laboratory shall report, to 3 significant figures, the concentration in milligrams per gram (mg/g) of the cannabinoids listed above.
- 5.5.6 Each sample of each batch of product must meet the pre-determined specifications before the batch may be considered for release for sale to the contracted customer.

5.6 RESIDUAL SOLVENT TESTS:

- 5.6.1 The contract laboratory will analyze samples of batches for residual solvents and processing chemicals where applicable.
- 5.6.2 A laboratory does not need to analyze for residual solvents and processing chemicals in dried flower samples.
- 5.6.3 For residual-solvent testing, the laboratory shall report that the sample “passed” if the concentrations of residual solvents are at or below the following residual solvents and processing chemicals action levels:
