STANDARD OPERATING PROCEDURE

PROCEDURE FOR RECEIVING STOCK

Page 1 of
6

SOP No:	4-FPH-032	Effective Date:	2020-06-23
Revision No:	2	Supersedes:	1
Revise By:	2022-06-23		

LIST OF ABBREVIATIONS

AR	Authorised Representative
SOP	Standard Operating Procedure
S6	Schedule 6
RTS	Return to Supplier

1. OBJECTIVE:

This Standard Operating Procedure (SOP) describes the process for the receiving of goods at ILCO Farming.

2. SCOPE:

This SOP describes the receiving, checking, and capturing process for stock received at the facility and shall be implemented by all personnel handling stock in the Facility.

3. RESPONSIBILITY:

AR	Authorised Representative
FM	Facility Manager

4. POLICY:

Efficient handling of items received by the facility is required for compliance and traceability purposes.

5. PROCEDURE:

5.1 On arrival of the delivery truck at ILCO Farming the receiving personnel will inspect the delivery vehicles for the following:

5.1.1 That the products were protected from direct sunlight and rain, i.e. the delivery truck has a closed canopy.

6

SOP No:	4-FPH-032	Effective Date:	2020-06-23
Revision No:	2	Supersedes:	1
Revise By:	2022-06-23		

5.1.2 The delivery truck does not have evidence of spillage inside that could lead to possible contamination or have been exposed to anything that can cause contamination to the products, e.g. any hazardous substances.

5.1.3 The delivery truck is lockable to secure the products delivered.

5.1.4 Delivery vehicle must be checked for possible external contamination and if so, reported and goods returned to manufacturer/supplier.

5.2 Goods will be received in a dedicated Receiving Area.

5.3 Upon receipt, each incoming delivery should be checked against the relevant documentation and physically verified by checking or conducting the following:

- From approved Supplier on Supplier's List
- Quantity of cartons received against quantity of cartons on delivery sheet
- De-dusting
- Damage to any cartons, leaking, dirty
- The identity of the stock
- The batch numbers of the stock
- The expiry date of the stock
- The pack sizes
- Check for valid purchase order number
- Type of product (refer to hazardous and specified S6 list)
- Storage conditions (is the product a cold chain item)
- The status as to whether released or to go into the quarantine area
- The signature of the person who received the stock
- All Schedule 6 stock must be received in the presence of the AR

5.4 All goods will be identified by a unique order number. Goods received will be processed as follows:

- A list of products requiring special handling and/or storage instructions must be available at the receiving area and consulted.
- All thermolabile products must be noted and immediately sent to the cold storage area.
- Thermolabile products must receive priority and must be stored in the refrigerator immediately according to a system and as per storage conditions (e.g. "store upright", "store between 2 – 8°C").
- Check that cold boxes are intact, and the cold chain maintained.
- Hazardous or flammable products are stored in the specified area.
- Any faulty items received will be noted on the invoice for possible return for credit and the item will be moved to the RTS area.
- All items received with a short expiry date will be brought to the attention of the AR, as it could be preferable not to accept these items and return same to the supplier.

- Specialized S6 medicinal cannabis products must receive priority and be stored in the demarcated S6 medicinal cannabis area.

- 5.5 When all checks have been completed and all the discrepancies have been noted, the receiving personnel will sign the delivery note. A statement is included to advise that only the packaging was checked and not necessarily the contents.
- 5.6 The stock will be placed in the relevant quarantine area, prior to checking. Refer to SOP: Procedure for Goods in Quarantine 4-FPH-027.
- 5.7 Capture the stock onto the facilities database and attach the proof of receipt, the Goods Received Note and the supplier invoice and send the pack to the accounts department for processing.

Revision No:	3	Supersedes:	2
Revise By:	2022-08-17		

LIST OF ABBREVIATIONS

AR	Authorised Representative
SOP	Standard Operating Procedure
S6	Schedule 6

1. OBJECTIVE:

This SOP describes the process for handling specified Schedule 6 medicinal cannabis at ILCO Farming (Pty) Ltd.

2. SCOPE:

This SOP shall be implemented by all employees and contractors when engaging in handling S6 goods that are subject to special handling instructions at ILCO Farming (Pty) Ltd.

3. RESPONSIBILITY:

AR	Authorised Representative
DAR	Deputy Authorised Representative
QAM	Quality Assurance Manager
FM	Facility Manager

4. POLICY:

Correct documentation and controls must be in place to receive, store, produce and supply specified schedule 6 medicines. Receiving and dispatch of specified schedule 6 medicinal cannabis products must be conducted by the AR. The schedule 6 medicinal cannabis storage area must be secure with access control under the responsibility of the AR. Record keeping of S6 products require quarterly reconciliation reports – March, June, September, and December. South Africa is co-signatory to the 1961 Convention on Narcotic Drugs and the 1971 Convention on Psychotropic Substances of the International Narcotics Control Board (INCB). The said Conventions as well as the Medicines and Related Substances Act, 1965 (Act 101 of 1965) require that annual returns on all sales of narcotic and psychotropic substances be submitted to the INCB in Vienna, Austria, before 28 February each year.

STANDARD OPERATING PROCEDURE

PROCEDURE FOR HANDLING OF S6 MEDICINES

Page 2 of 7

SOP No:	4-FPH-033	Effective Date:	2020-08-17
Revision No:	3	Supersedes:	2
Revise By:	2022-08-17		

5. PROCEDURE:

5.1 A list of the S6 medicinal cannabis products will be maintained and available on site.

5.2 Products must be checked to ensure that those requiring special handling are handled in the correct manner.

5.3 Schedule 6 substances will immediately be secured and the AR must be made aware of the arrival of Schedule 6 medicinal cannabis substances.

5.4 All specified schedule 6 medicinal cannabis products must be stored in a locked area.

5.5 Access is restricted to the AR or DAR.

5.6 A S6 register will be kept for these products showing the following:

- Date of receipt
- Type of product/product name
- Batch number and expiry date
- The quantity in words

5.7 The S6 register will be balanced on the last day of March, June, September, and December each year.

5.8 Annual returns of specified Schedule 6 substances in terms of Regulation 29 of the Medicines and Related Substances Control Act (Act 101 of 1965) will be submitted to SAHPRA by the AR.

The Register will specify the following details:

- Quantities held in stock on the 1st of January and the 31st of December each year
- Quantities destroyed, lost or stolen
- Quantities acquired by importation of the substance as a raw material or as contained in a preparation, local production of the raw material and local purchasing of the raw material
- Quantities used in the production of any other specified Schedule 5, Schedule 6, Schedule 7 or any other scheduled substances

5.9 The products will only be sold against a written and signed order form from the approved off-taker, indicating the following:

- Name of company
- Company registration no
- Off-take agreement no./date
- Address of authorized person placing the order
- Date of issue of the order
- Approved name of the product

- Dosage form
 - Quantity to be supplied
- 5.10 The picking, packing, and sealing of the order will be overseen by the AR.
- 5.11 The Schedule 6 medicinal cannabis stock is packed in a carton for delivery, separately from other items.
- 5.12 A Schedule 6 label is applied to the carton.
- 5.13 The carton is moved to the dispatch area by the AR when the transport has arrived on site.
- 5.14 The S6 register will be updated to include the date each batch number and quantity is removed from the S6 storage area. The AR will sign the S6 register.
- 5.15 When the parcel is picked up for delivery the driver will sign the dispatch note.
- 5.16 Copies of all delivery notes, goods received notes and orders/invoices will be kept with the register for each product for 5 years or as required by the site.

SOP No:	4-FPH-036	Effective Date:	2020-07-08
Revision No:	2	Supersedes:	1
Revise By:	2020-07-08		

LIST OF ABBREVIATIONS

AR	Authorised Representative
SOP	Standard Operating Procedure

1. OBJECTIVE:

This SOP describes the procedure for use of the spillage kit at ILCO Farming (Pty) Ltd.

2. SCOPE:

This SOP describes when and how to use a spillage kit at ILCO Farming.

3. RESPONSIBILITY:

AR	Authorised Representative
FM	Facility Manager

4. POLICY:

Spillages should be cleaned as soon as possible to prevent possible contamination, cross-contamination, and possible injury. Spillages must be reported to the Authorised Representative for immediate action. A spillage kit must be available on site to clean possible spillage according to this written procedure.

5. PROCEDURE:

Spillage in the facility:

- 5.1 Identify the nature of the spillage.
- 5.2 Notify the AR/FM or dedicated person on duty.
- 5.3 Place the rubber gloves on your hands, found in the spillage kit, before starting with the clean-up of the spillage.
- 5.4 Liquids: carefully scoop up the broken container (glass pieces) and place in a clear plastic bag.
- 5.5 Wipe up the liquid from the floor with paper towels provided; spray the area with disinfectant.

- 5.6 Wipe clean with a dry paper towel.
- 5.7 For larger spillages, mop the area with a moist mop before spraying disinfectant.
- 5.8 Non-Liquids: Carefully scoop up the broken container pieces.
- 5.9 Using the hand broom, sweep up all contents from the surface.
- 5.10 Place in a clear plastic bag.
- 5.11 Spray surface with disinfectant and wipe dry with hand towel.
- 5.12 Place used paper towels in the plastic bag with the broken container.
- 5.13 Seal the plastic bag and place into the dedicated destruction container in the Goods for Destruction area.
- 5.14 For spilt medicinal cannabis product, the FM will weigh the quantity spilt and record this weight in the batch processing document.
- 5.15 Damaged stock will be adjusted electronically in the stock control system by the AR who will provide the appropriate reason for the adjustment.
- 5.16 Clean and dry all equipment used during the spillage procedure and place in the dedicated area for future use.

Spillage received from Supplier:

- 5.17 Upon receipt of stock, where a spillage is identified, the AR must be notified immediately.
- 5.18 Receive the invoice into the system.
- 5.19 Place the damaged stock in a clear plastic bag and place in the goods for destruction area.
- 5.20 Clean the spillage as per point 5.4 or 5.8.
- 5.21 Raise a claim with the supplier.
- 5.22 Clean and dry all equipment used during the spillage procedure and place in the dedicated area for future use.

Upkeep of the spillage Kit:

- 5.23 An example of items included in a Spillage Kit:
 - Heavy Duty PVC Ziploc Bag (43 x 62.).
 - Universal Absorbent Scatter 200g.
 - Mop and bucket.
 - Universal Absorbent Pads 200g.
 - Scoop & Brush.
 - Rubber Gloves.
 - Dust Mask.
 - Safety Glasses.

Supersedes: 1

Revise By: 2022-07-08

LIST OF ABBREVIATIONS

AR	Authorised Representative
SOP	Standard Operating Procedure
SAHPRA	South African Health Products Regulatory Authority

1. OBJECTIVE:

To finalize stock on hand and trading for the current month and prepare the computer system and reporting logs for the new trading month.

2. SCOPE:

This SOP will involve quality and financial activities that need to be reconciled on a monthly basis.

3. RESPONSIBILITY:

AR	Authorised Representative
QAM	Quality Assurance Manager

4. POLICY:

Where a computerized stock control system is used, the software and computer equipment must be suitable for the task and well-maintained and responsible personnel will be trained on how to use the system. Stock records must be accurate and up to date in order to complete the month-end process for compliance with the SAHPRA requirements for medicinal cannabis material.

5. PROCEDURE:

5.1 The following activities will be completed by the QAM at month-end:

- Temperature and humidity graphs will be printed or saved and reviewed for the previous month.
- Cleaning logs will be filed, and new ones will be put out.
- A complete stock take of medicinal cannabis material will be done by the AR and the AR will compare those quantities against the quantities on the electronic operating system.

- If a discrepancy is noted, the AR will raise a deviation and investigate within 24 hours, to arrive at a conclusion.

5.2 The following financial reports will be printed, and updates completed on the system:

- Print Creditors Age Analysis.
- Print Creditors Control Account.
- Print Creditors Ledger.
- Print Debtors Age Analysis.
- Print Nett Monthly Sales Analysis.
- Print Debtors Statements.
- Print Stock Adjustments.
- Print Transaction Report by Account.
- Print Profit by Account.

5.3 A list of all medicinal cannabis items with an expiry date of less than 3 months will be reviewed by the QAM to discuss the options for using or selling, with the AR.

- 5.3.1** Where a medicinal cannabis item is moved from available stock, to reject stock, the quantity of this stock will be updated on the electronic system.

Medicines and Related Substances Act (Act 101 of 1965) and SAHPRA's Guidelines for destruction of S6 medicines. The rejected goods area must be kept locked and must be controlled by the AR. Products shall only be destroyed by an authorised destruction site which has a valid contract with ILCO Farming (Pty) Ltd and is compliant with SAHPRA requirements and regulations. S6 Products will be stored in a separate labelled area within the rejected goods area.

5. PROCEDURE:

5.1 General Procedure:

- 5.1.1 **SOP: 4-FPH-021 PROCEDURE FOR HANDLING OF DAMAGED AND REJECTED GOODS** will be followed and authorised by the AR.
- 5.1.2 All rejected products will be moved into the rejected goods area for destruction.
- 5.1.3 The information for each rejected product will be recorded on the Damaged and Rejected Goods Register (DRGR).
- 5.1.4 Destruction of S6 medicine will be conducted in accordance with SAHPRA guidelines for destruction of S5/S6 medicines and substances.
- 5.1.5 Destruction may only take place after a written authorization by SAHPRA has been issued, specifying the quantities indicated in the request. Refer to 5.06 SAHPRA Guideline on Destruction of S6 medicines and substances.
- 5.1.6 All destruction must take place in accordance with local municipal regulations regarding disposal of chemical and medicinal waste.
- 5.1.7 All medicines or substances must be destroyed in such a manner that does not allow recovery.
- 5.1.8 Details of pack type and quantity sent to the contract site for destruction will be recorded on the DRGR. The date of destruction will be entered once the destruction certificate has been received.

5.2 Application for authorised destruction

- 5.2.1 ILCO Farming (Pty) Ltd must send a list of products for destruction with specific quantities of the medicines or substances in writing to the contract service provider.
- 5.2.2 The list will indicate:
 - The name of each medicine or substance to be destroyed
 - The exact quantities, batch numbers and schedule status (if applicable) of the medicines or substances to be destroyed
 - the reason for the destruction
- 5.2.3 The contract service provider will send a quote to ILCO Farming (Pty) Ltd for

approval or if the fees have already been agreed, they will retain this list to reconcile against the stock when received.

- 5.2.4 The contract service provider will request permission from SAHPRA to destroy all S5/S6 products.
- 5.2.5 SAHPRA will authorise the destruction of the medicines or substances in question in writing, specifying the quantities indicated in the request.
- 5.2.6 Destruction may only take place after the written authorisation from SAHPRA has been received.
- 5.2.7 Destruction certificates for S5/S6 products and the letter of authorisation must be referenced in or attached to the DRGR and retained for the document retention time period applicable to ILCO Farming (Pty) Ltd. A minimum of 5 years retention is required.
- 5.2.8 The number on the destruction certificate must relate to the products in the register and the document number must be entered into the register.

5.3 Method of destruction:

- 5.3.1 ILCO Farming (Pty) Ltd's method of destruction will be incineration for all cannabis products and destruction will be conducted by the reliable service contractor who specializes in waste disposal.
- 5.3.2 This contractor will employ a Pharmacist.
- 5.3.3 The Pharmacist will witness the destruction of the correct quantities of the S5/S6 medicines or substances authorised for destruction.
- 5.3.4 The Pharmacist will provide a valid certificate of destruction to ILCO Farming (Pty) Ltd.

5.4 Schedule 6 register:

- 5.4.1 Every S6 product will be included in the S6 register.
- 5.4.2 The following details will be included:
 - Name and address of the supplier
 - Name of product
 - Quantity supplied
 - Delivery note number
 - Date received
 - Received by
 - Name and address of client

LIST OF ABBREVIATIONS

AR	Authorised Representative
SOP	Standard Operating Procedure
FM	Facility Manager
QAM	Quality Assurance Manager
OOS	Out of Specification
QC	Quality Control

1. OBJECTIVE:

This Standard Operating Procedure describes the process for reprocessing medicinal cannabis products at ILCO Farming.

2. SCOPE:

This SOP applies when engaging in reprocessing medicinal cannabis products which have not met their specification requirements, and which have been approved for reprocessing by the QAM and AR.

3. RESPONSIBILITY:

AR	Authorised Representative
QAM	Quality Assurance Manager

4. POLICY:

To ensure that only authorised and approved medicinal cannabis products are removed from the quarantine store and returned to the processing areas for further processing according to a reprocessing protocol, with authorisation by AR prior to use. Reprocessing is the reworking of all or part of a batch of product of an unacceptable quality from a defined stage of production so that its quality may be rendered acceptable by one or more additional operations.

PROCEDURE FOR REPROCESSING

Page 2 of 5

SOP No:	4-FPH-040	Effective Date:	2020-07-10
Revision No:	2	Supersedes:	1
Revise By:	2022-07-10		

5. PROCEDURE:

- 5.1 The AR together with the QAM will review each Incident or Deviation form that is raised for an OOS result.
- 5.2 The reprocessing of an OOS batch will only be considered and permitted if the quality of the final product is not affected.
- 5.3 The QAM will compile a Reprocessing Protocol which includes the section taken from the master batch processing record, which stipulates the process to follow.
- 5.4 This protocol will be checked by the AR who will authorise it prior to being used.
- 5.5 Each protocol will be given a unique number and the batch number of the batch to be reprocessed will be captured in this protocol, for full traceability purposes.
- 5.6 Each batch approved to be reprocessed will only be subjected to a part of the process that is already included in the master batch processing records. No new processes are permitted to be included in the reprocessing operation.
- 5.7 The AR will authorise the removal of approved batch from the quarantine area, and the initiation of the reprocessing operation.
- 5.8 The QAM or AR may authorise additional testing of the reprocessed finished product.
- 5.9 The reprocessed packed finished product will be sampled, and these samples will be QC tested for all tests that are included in the finished product specifications.
- 5.10 The AR will review the COA for each reprocessed batch and will only permit the release of each batch when it fully complies with all specifications.
