BY ILCO FARMING

OWNER STATUS REPORT

WEEK TO FRIDAY · 6 JUNE 2026

A week that moved Origin from "a store that's open" to "a platform ready to scale." The Potchefstroom till is now trading on numbers you can trust, the medical and farm sides are connected, and — most importantly — the machinery to bring **new pharmacies onto the network** is built, with our second outlet already queued.

THE STORE, ON NUMBERS YOU CAN TRUST

A week of hardening the live Potchefstroom till.

- ✓ **Takings made accurate.** VAT corrected to inclusive pricing; pre-launch test transactions removed (the figure dropped from an inflated **R6,645 to the true R2,176**); card takings now reconcile **to the cent** against the Capitec terminal.
- ✓ **Day-end & float fixed.** Removed the phantom R500 float and the kiosk pop-up bug that stopped Ray closing; shifts now balance and close cleanly.
- ✓ **Stock that behaves.** Sales now deduct stock correctly, new products appear on the till instantly, and the **brand-first Wellness layout** with product images is live for staff.
- ✓ **Reporting.** A new **Takings Report** — any date range, cash/card split, daily breakdown, CSV/PDF — with **email to stakeholders**.

THE MEDICAL & COMPLIANCE LAYER

Building the regulated foundation under the retail.

- ✓ **Patient portal & Section 21 gate.** Online medical orders are now gated behind Section 21 status and prescription upload, with a pharmacist review queue — grounded to a legal-foundation map.
- ✓ **Compliance tooling** continues to mature — POPIA data-consent layer, SOP library and GMP inspection-readiness, keeping us audit-ready for SAHPRA.

FARM ↔ RETAIL CONNECTED

One view from cultivation to till.

- ✓ **Owner Dashboard (TnT-ZA).** A combined farm + retail view, with the Potchefstroom store's live takings pulled into the farm platform via a secure bridge.

THE NATIONAL NETWORK ENGINE

The week's headline — how Origin scales past one store.

- ✓ **Outlet onboarding system.** A document-gated wizard for pharmacies to join Origin — verifies **SAPC premises & Responsible Pharmacist, company & banking**. The medical-cannabis authority (SAHPRA 22A / Section 21) stays with **ILCO Farming**; a joining pharmacy only proves it's a licensed pharmacy.
- ✓ **One-click activation.** An admin review screen checks the documents, switches the outlet's **own branch-scoped POS** live and seeds the product catalogue — ready to trade.
- ✓ **Branch #2 queued: Röscher Pharmacy, Kroonstad** — loaded and ready to onboard as the first network pharmacy dispensing ILCO medical cannabis.

BRAND & PRODUCT

A house identity worth franchising.

- ✓ **Origin Design System** + a custom **Origin & TnT-ZA icon language** — one consistent look across every surface.
- ✓ **Origin Botanica** — a farm-to-skin cosmetic range proposal, turning post-trim farm material into a high-margin house range the whole network can carry.

NEXT WEEK

- Onboard **Röscher Pharmacy** live — first network outlet.
- **Capitec card-report upload** for fully automated reconciliation.
- Finalise **Origin Botanica** costing & first product line.
- **Onboard & train the farm team on TnT-ZA** — the Facility Manager, cultivation, processing and compliance, on-site at the farm.
